

Pervious Concrete – California’s greatest tool for Stormwater Management and Aquifer Replenishment!

A workshop designed for contractors, designers and public works officials in Southern California

Pervious Concrete Workshop

When it Rains, It Drains!

Pervious concrete pavement is a unique and effective means to address important **environmental** issues and support **sustainable** growth. By capturing stormwater and allowing it to seep into the ground, porous concrete is instrumental in re-charging groundwater, reducing stormwater runoff, and meeting **U.S. Environmental Protection Agency (EPA)** stormwater regulations. In fact, the use of pervious concrete is among the **Best Management Practices (BMPs)** recommended by the EPA – and by other agencies and geotechnical engineers across the country – for the management of stormwater runoff on a regional and local basis.

Come and see how you, too, can utilize this important new **environmental** tool. This workshop is designed to train and qualify contractors in the proper techniques in the placement of pervious concrete. For contractors, and those others that choose to, there is an exam that certifies you as a Certified Pervious Concrete Technician (CPCT). As a CPCT you can be included in the promotion of pervious concrete by CalCIMA. Don't miss this opportunity!

What you will Learn:

- Pervious concrete materials and mix proportioning
- Proper use of tools and equipment
- General design principles of pervious concrete pavements
- Pervious concrete construction
- Maintenance and troubleshooting

Presenter:

Mr. David Akers, PE. Senior Engineer, California Nevada Cement Association.

Locations:

This important workshop will be held in eight locations per the following schedule:

Check the location you will attend

- | | |
|--|--|
| <input type="checkbox"/> June 26 San Diego | <input type="checkbox"/> July 19 San Luis Obispo |
| <input type="checkbox"/> July 17 Ventura | <input type="checkbox"/> July 26 Inland Empire |
| <input type="checkbox"/> July 18 Santa Barbara | <input type="checkbox"/> July 31 Orange County |

You will be notified of the exact site once you have registered.

Schedule:

- | | |
|----------|---|
| 8:30 AM | Registration/Continental Breakfast |
| 9:00 AM | Workshop |
| 11:30 AM | Lunch |
| 12:30 PM | Demonstration/Placement of pervious concrete. Contractors must bring their boots. You will be helping in a hands-on placement of the material. Not at all locations. |
| 2:00 PM | Written exam for those <u>who choose</u> to take it. |
| 3:00 PM | Conclusion. |
