

FIGURE 6: RELATIVELY UNDISTURBED STREAMS

Upper Mission Creek (M-3)

Upper Matilija Creek (MA-2)

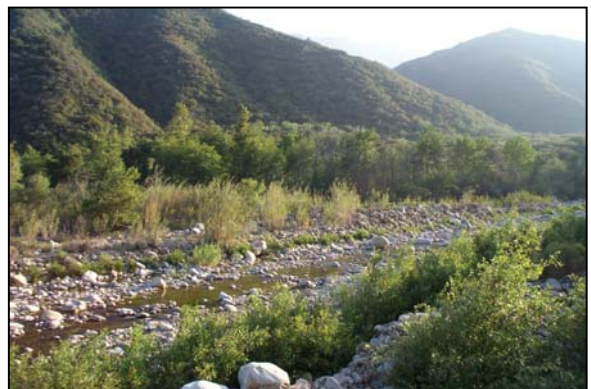

Upper San Jose Creek (SJ-3)

Collectively, the undisturbed study reaches range from small, high-gradient 1st-order mountain tributaries to fairly large, low-gradient 5th order streams. The photographs above and to the left show examples of high-gradient mountain streams. The photographs on the bottom show examples of larger, low-gradient streams.

Lower Sespe Creek (SES-1)

Lower Matilija Creek (MA-2)
